SUMMARY

Front-End Engineer based in Larvik, Norway, with a passion for building modern, high-performance, and user-friendly web applications. I specialize in React, TypeScript, and UI/UX development, and I enjoy crafting intuitive and scalable digital experiences.

With a strong background in JavaScript/typescript frameworks, state management tools like Zustand and Redux, and experience with web performance optimization, I aim to deliver clean, maintainable, and efficient code.

Currently taking backend education to expand my skills

EXPERIENCE

Junior Front-end engineer

Gjensidige Mobility Group. – Larvik, Nor
June 2024 – August 2025
